FACCE-MACSUR

D-C4.5.1 (M36)

Concepts and methods developed for probabilistic evaluation of a number of alternative adaptation options (postponed to M 36)

Margarita Ruiz-Ramos*, Roberto Ferrise, Reimund P. Rötter, and other members of IRS2 core team

*margarita.ruiz.ramos@upm.es

Instrument: Joint Programming Initiative
Topic: Agriculture, Food Security, and Climate Change
Project: Modelling European Agriculture with Climate Change for Food Security (FACCE-MACSUR)
Start date of project: 1 June 2012
Duration: 36 months
Theme, Work Package: CropM 4
Deliverable reference num.: D-C4.5.1 (M36)
Deliverable lead partner: Technical University of Madrid, Univ. of Florence, Luke
Due date of deliverable: month 36
Submission date: 2015-07-30
Confidential till: 2015-11-01 (only the abstract may be published)
Protocol for conducting an impact response surface analysis (IRS2) to study adaptation options for wheat cultivation in Spain using an ensemble of crop models in MACSUR (CropM/WP4) -- Last update: May 2015 (v.10)

Margarita Ruiz-Ramos, Roberto Ferrise, Ignacio Lorite, Alfredo Rodríguez, Nina Pirttioja, Stefan Fronzek, Marco Bindi, Tim Carter, M. Inés Mínguez, Holger Hoffmann, Taru Palosuo, Fulu Tao, Mirek Trnka, and Reimund P. Rötter.

(MRR, IL and RF take the lead; together with IM, AR, FT, NP, SF, MB, TC, TP and RR they form the core group responsible for this study; in addition, MT, HH assisted in designing the study and establishing the database)

Abstract/Executive summary

The purpose of this document is to define the protocol for a second study (IRS2) based on impact response surfaces (IRSs) in the frame of CropM/WP4. General considerations of IRS construction are described in the protocol developed for Phase I of the IRS analysis (IRS1)
